World Leader in Nuclear and Chemical Process Safety Fauske & Associates Receives ISO 17025 Accreditation

Burr Ridge, IL-

Reporting a perfect safety record since 1992, recording zero Days Away Case Rate (DACR), Fauske & Associates, LLC (FAI) proudly announces successful completion of ISO 17025 Certification.

“I would like to thank our team of professionals for working diligently and effectively to complete this extraordinary achievement,” states Hans K. Fauske, D.Sc, President. “With our customer’s best interest at the center of all we do, we are proud to offer nothing less than the highest standard in the industry.”

In 1980, FAI assumed early leadership roles in the acclaimed DIERS program for AIChE and the IDCOR program for the nuclear power industries. These activities led to state-of-the-art methodology and laboratory tools for characterizing chemical systems and computer models for analyzing severe accidents in commercial nuclear power plants that are being used worldwide. Recognized worldwide for phenomenological modeling, related to the prevention and accommodation of chemical and nuclear power accidents, FAI also provides advanced training and research in physics, chemical engineering, mechanical engineering, nuclear engineering, computer science and other fields. FAI is ISO-9001 and TickIT certified.
