

Litigation Support

Fauske & Associates, LLC (FAI) offers technical expert litigation services as well as an In-House Thermal Hazards Testing Laboratory capable of simulating accidents that involve failure or breakdown of equipment procedures, human error or other root causes. This includes development and assessment of the accident, evaluating the evidence to determine what is relevant to the case and what is not. The engineers at FAI have extensive background and experience dealing with chemical, pharmaceutical and other related facilities. We have been retained by both insurance companies and law firms. With over 28 years of experience and the leaders of DIERS Technology, we are able to evaluate accidents and determine the most probable causes, given the available information and evidence.

Services include:

- ✦ Expert Opinion
- ✦ Material Characterization
- ✦ Expert Witness
- ✦ Accident Simulation
